

Quality Policy

„Quality and HSE ensure customer satisfaction. We meet our customers' expectations for flawless components, ecological responsibility, effective solutions, and high availability.“

- Quality is a core value at KIEPE. We have implemented a comprehensive quality, health, safety, and environmental management system with the goal of improving every single day.
- We understand that high-quality, reliable products, systems, and services are the foundation for achieving our corporate goals, such as growth, profitability, and best-in-class status.
- Therefore, all employees take responsibility and drive the continuous improvement of our processes

Quality is One of Our Core Values

With this mindset, we are able to:

- Provide the most useful solutions to our customers,
- Meet high customer expectations and continuously improve our products and services,
- Operate an effective quality management system and continuously expand it.

Quality is Achieved Through Responsible Actions by Everyone

That is why we strive to:

- Create an environment focused on error prevention, continuous learning, and development,
- Utilize the knowledge and experience of every individual across all countries and cultures,
- Deliver products and solutions that meet our own quality standards and customer requirements. Only these quality products may leave our workplace.

Product Quality is a Success Factor

That is why we aim to:

- Set benchmarks for quality and product safety in our industry,
- Be the technology and market leader for product quality and safety throughout the entire product lifecycle,
- Use customer requirements and sustainability principles as the basis for developing reliable products for safe and economical operations.
