

Safety Policy

Leading manufacturers of rail vehicles integrate KIEPE electrical systems and components into their vehicles. Among local transportation companies, the name Kiepe Electric stands for innovation, customized product solutions, expertise, service, and sustainability. In addition to the continuously increasing demands for reliability, availability, and maintainability, the safety of our components, systems, and projects remains our highest priority.

Each of us holds the constant responsibility to ensure the safety of those who rely on our products through the development, manufacturing, assurance, and delivery of the highest quality. Our safety policy guides and supports us in this endeavor.

Safety is One of Our Core Values

- We guarantee compliance with the legally applicable safety requirements of our components, systems, and projects. Our safety objective is to prevent any disruptions caused by our products.
- We are committed to creating the organizational conditions necessary to achieve this goal and to establish a safety culture at all levels of the company for the development and maintenance of our components, systems, and projects.
- We strive for continuous improvement of our products, systems, and services.
- We actively participate in key committees and organizations to stay updated on the requirements of applicable safety standards.

Product Safety as a Decisive Success Factor

- We dedicate ourselves to developing and manufacturing safe products and systems across the entire supply chain, aiming to set

benchmarks in product safety.

- We are committed to being the technology and market leader in product safety throughout the entire product lifecycle.
- We develop and deliver products and systems with high reliability for the safe operation of vehicles based on our customers' requirements and sustainable principles.

Responsibility and sustainability of Each Individual are Crucial

- We involve everyone in the process and product improvement and foster an environment of continuous learning and development.
- We acknowledge that together we are responsible for ensuring the quality and safety of our products.
- We benefit from the knowledge, experience, and expertise of every individual across global companies and cultures.
- We are aware that each of us is a "Safety Gate" and that only products and outcomes that meet the legally applicable safety standards and our customers' requirements may leave our workplace.
